

Please add new Claims 27-45 as follows.

~~26~~ 27. (New) In a wall structure that is contained in a building structure exposed to transverse wind loading, the improvement comprising said wall structure containing a first layer having a density of about 0.5-3 lb./ft.<sup>3</sup>, a second, reinforcing layer selected from the group consisting of a polymer fabric and a biaxially oriented polymeric film directly bonded to the first layer and a cellulosic layer selected from the group consisting of paper, paper fiberboard, plastic-coated paper and plastic-coated paper fiberboard laminated to the second, reinforcing layer.

3  
4  
~~27~~ 28. (New) The wall structure of Claim ~~27~~<sup>26</sup>, wherein an exterior layer is laminated to the cellulosic layer and an interior layer is laminated to the first layer.

~~28~~ 29. (New) The wall structure of Claim ~~28~~<sup>31</sup>, wherein said second, reinforcing layer is a biaxially oriented polymeric film.

~~29~~ 30. (New) The wall structure of Claim ~~29~~<sup>30</sup>, wherein said first layer comprises a foamed material.

~~30~~ 31. (New) The wall structure of Claim ~~30~~<sup>33</sup>, wherein said foamed material is an organic material.

~~31~~ 32. (New) The wall structure of Claim ~~31~~<sup>24</sup>, wherein said organic material is selected from the group consisting of polystyrene and polyurethane.

~~32~~ 33. (New) The wall structure of Claim ~~32~~<sup>20</sup>, wherein said layer comprises a fiberboard material.

~~27~~ 34. (New) The wall structure of Claim ~~27~~<sup>26</sup>, wherein said second, reinforcing layer is a polymer fabric made of a thermoplastic material.

~~28~~ 35. (New) The wall structure of Claim ~~34~~<sup>27</sup>, wherein said thermoplastic material is selected from the group consisting of polyethylene and polypropylene.

~~29~~ 36. (New) The wall structure of Claim ~~34~~<sup>27</sup>, wherein the polymer fabric is woven.

~~30~~ 37. (New) The wall structure of Claim ~~27~~<sup>26</sup>, wherein said second, reinforcing layer is a biaxially oriented polymeric film made of a thermoplastic resin.

~~31~~ 38. (New) The wall structure of Claim ~~37~~<sup>30</sup>, wherein the thermoplastic material is a polyolefin or a polyester.

~~32~~ 39. (New) The wall structure of Claim ~~37~~<sup>20</sup>, wherein the cellulosic layer has a plastic film formed thereon.

~~33~~ 40. (New) The wall structure of Claim ~~37~~<sup>20</sup>, wherein the cellulosic layer is impregnated with a member selected from the group consisting of a resin, an adhesive and mixtures thereof.

~~34~~ 41. (New) The wall structure of Claim ~~40~~<sup>33</sup>, wherein said cellulosic layer is impregnated with a urethane.

~~35~~ 42. (New) The wall structure of Claim ~~40~~<sup>33</sup>, wherein said cellulosic layer is impregnated with a polyester.

~~36~~ 43. (New) The wall structure of Claim ~~40~~<sup>33</sup>, wherein said cellulosic layer is impregnated with a urethane and a polyester.

5-3 Con. P.
